

Notes on joining a New Sapience Zoom video conference

Open a web browser (Chrome works well if you have it). Type or cut/paste <https://zoom.us/j/747282203> into the URL area at the top of your browser.

The URL takes you to the Zoom “meeting page”. Once there you should see options to “Choose ONE of the audio conference options.” Assuming you are using a computer, select the “Computer Audio” tab, and select the “Join with Computer Audio” button.

You should be able to see your own video (if not, ensure your camera is on and the lens uncovered) and your audio should now be enabled through your computer (so that you don’t need to also use a telephone for audio).

We are looking forward to the conference!
